

1. **Sign** in button is not working, where it is appearing. That means while clicking on it, not navigating to any other page for entering Sign in credentials.

Follow us-Logos are not working.

Taking invalid details. .

2. In **Follow us-logos** are not clickable, not navigating to those pages and not showing related information. Can't follow.

3. In **Contact us** page, we can give in-valid credentials like **Name** and **Email** as numbers.

- After click on **Send Message**, we didn't get any response like "Your message is submitted successfully".
- I think better to make **Type of contact** field as mandatory, because we have to contact with a reason.

First-name  
2345678

Last-name  
23456i

Email ID  
sfgf@235

Phone Number  
2134567890

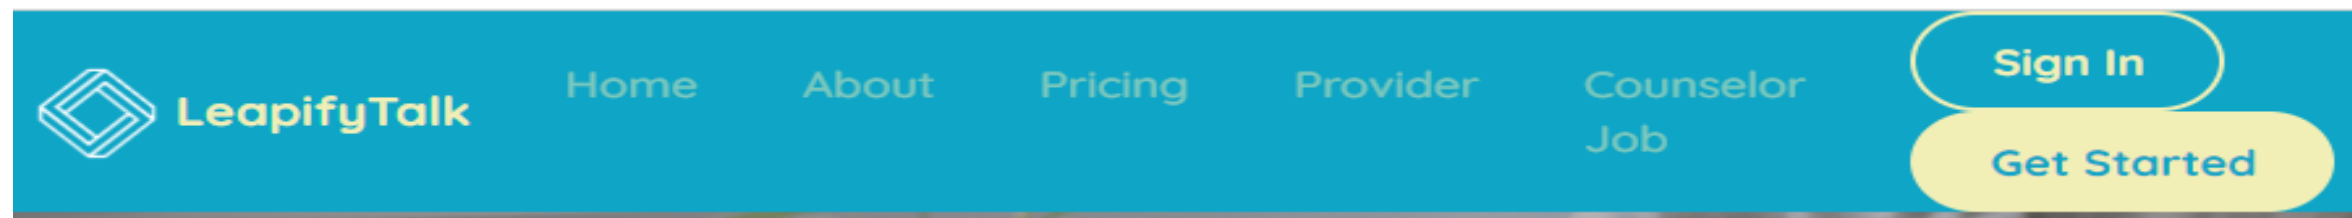

Liscence Number  
1234567890122345

Send message

4. Accepting invalid data for **First-name, Last-name and Email ID** as numbers, symbols etc...,

- I think **Send message** button is not suitable. Better to have a **Submit** button because of there submitting data for Counsellor job not sending any message.
- After clicking on **Send message**, didn't get any response like "**Your form submitted successfully, Soon we will reach out you**" as a pop up message. Popup messages will give the conformation to the end user.

5. The colour of the navigation buttons should be in dark colour (like black) then they are easy to recognize or easy to identify the name of the button.

Get Started

6. After clicking on **Pricing** in the action pane, navigate to the above page. There if we click on **Get started** it will navigate to another page and ask some questions. After answering all the questions **Sign in** will appear then nothing is happening.

These are all the bugs I found in the **LeapifyTalk**.

**Thank you..!**
